TO THE FOOD AND DRUG ADMINISTRATION EXECUTIVES:

This letter is to confirm a phone message I sent today voicing my strong objection to your policy of using antibiotics used for humans in the feed of our domestic animals.

Why are we doing this? I believe that the Europeans are correct in banning our treated animal products. I further believe that our biologically altered vegetables are not in the best interest of the consumer public. I do not buy organically produced foods unless it is convenient, but I am 68 years old. If I were a young person I would think seriously about buying fresh vegetables grown under unknown conditions.

Thank you for your attention.
